

PLACE collections made simple

PLACE (Patient Led Assessment of the Care Environment) assessments have now replaced the former Patient Environment Action Team (PEAT) inspections as the new system for assessing the quality of the patient environment. PLACE focuses entirely on the patient care environment in a move that gives patients the opportunity to take a central role in driving the health services they receive at a local level.

fmfirst® PLACE mobile data collection tool

In order to achieve a more comprehensive assessment of an organisations facilities, PLACE now covers a greater number of assessment criteria. Assessments include areas such as: cleanliness; safety and privacy; dignity and well-being; food and general building maintenance. This increased data collection is up to ten times the size of PEAT and as a consequence, trusts will see a significant increase in workload.

fmfirst® PLACE mobile is compatible with all mobile and tablet device formats. Each site can access its own unique data set, download appropriate scorecards and enter outcomes directly while at the assessment location. Data can be saved on the mobile device at any point and uploaded to the main application upon completion.

fmfirst® PLACE mobile has been developed to speed up the PLACE collection process with an emphasis on fast and efficient data collection without compromising on accuracy.

Benefit from:

- Live data entry at assessment site
- One point data entry for greater efficiency
- Reduced data input duplication and error
- Year-round inspections with PLACE Lite mobile
- ISO 9001:2013 development and ISO27001 data security

Paper-less technology

- Reduce the need for paper records
- Security is enhanced and all data is accessed and stored centrally

Drop down menu data selection

- Accurate, efficient form completion
- Standardised responses mean easier cross-referencing plus greater reporting accuracy

fmfirst® PLACE mobile has been designed to mirror your site specific score card criteria. All sites will be issued with a secure, site specific log-on to enable data access at any location.

Functionality can be used with or without a wireless connection. fmfirst® PLACE mobile offers full flexibility of access across all site locations.

fmfirst® PLACE Lite mobile - enjoy the benefits of PLACE mobile - all year round...! Choose where, when and what to inspect - actively measure the effectiveness of action plans and remedial actions compared against your previous PLACE collection results. By focusing on areas of concern, trusts can carry out year-round 'mini' assessments to measure improvements, focus resources and demonstrate standards compliance.
