

## The stock management system for the NHS

**With the benefit of more than 20 years experience of providing NHS CAFM solutions - Asckey now bring you fmfirst® stock. This intuitive software has been specifically developed to assist Trusts in meeting supply chain regulations as part of their service level excellence agreement obligations.**

fmfirst® stock allows you to monitor the cost of items used in fulfilling maintenance tasks, providing a highly practical addition to task management. Track Stock items, Stock Balances, Costs, Suppliers and Purchase Orders. Stock is allocated to specific Task Tickets providing accurate Task records and cost tracking.

fmfirst® stock includes key fmfirst® functionality to provide:

- Financial management with real-time stock checks and purchase order integration
- Supplier management for provision of essential stock supplies
- Task related stock allocation and accountability
- Procurement and logistics control
- Mobile stock control with barcode scanning
- Live data for accurate reporting
- Procurement system integrations for full-cycle stock requisitions

Innovative functionality simplifies and supports the gathering, reviewing and reporting of stock control information to support NHS sites compliance to current Care Quality Commission (CQC) guidelines for cleanliness and infection control.

### Mobile stock control

Trades staff can scan the Task Ticket number or Stock ID (for shelf mounted barcodes). On entering the quantities, stock levels are updated immediately in the stock location and the related details in the task ticket including stock used and costs.

Unused stock can be similarly managed using a PDA. Mobile Stock Checks are invaluable - fmfirst® can be integrated with barcode scanners to allow for remote stock checks and instant stock level data updates.

### Provable Performance and Peace of Mind

fmfirst® stock has been developed to provide reassurance that all planned and reactive stock control tasks are carried out to the appropriate time scales. Easy task tracking, reporting and Help Desk links allow for full traceability and control.

### Quality

The development of fmfirst® stock has been carried out under the latest ISO9001 and 27001 standards. This ensures that all current and future functionality meet stringent quality control procedures - giving you peace of mind over system reliability and functionality.

### fmfirst® future-proofing

Ongoing changes in the Healthcare sector require fully flexible and adaptable software solutions to ensure that functionality remains current and relevant as requirements change.

### Windows based intuitive functionality

The screenshot shows a 'Stock Details' window with the following information:

- Store Id: 01 (Store 01)
- Part Num: E020 (20mm 2A QUICK BLOW FUSE)
- Bin Ref: [empty]
- Last Used: 11/02/2016 18:43
- Checked: 28/04/2004 00:00
- Active:

General tab details:

- Supplier: SCREWFIX (SCREWFIX)
- Coshh Ref: [empty]
- Manufacturers Ref: [empty]
- Minimum: 0.00
- Level: 56.00
- Re-Order Level: 0.00
- Bought: £0.2400
- Maximum: 100.00
- Allocated: 0.00
- Re-Order Qty: 100.00
- Charged: £0.28
- On Order: 0.00
